PROFILE INFO

Algorithm Engineer and Backend Developer with Expertise in Frontend Development, Data Science, and Database Management.

MY SKILLS & EXPERTISE

PROFICIENT

C#
.NET
LINQ
ADO.NET
ASP.NET
Entity Framework
MS SQL SERVER
GitHub

PRIOR EXPERIENCE

C++
HTML
CSS
JavaScript
Python
C
PostgreSQL
Java

WORK EXPERIENCE

Informatics teacher

2021 - 2022

For one year, I taught high school students Python and various technologies. We explored programming and discovered new ways to solve problems.

VOLUNTARY ACTIVITIES

I teach .NET and programming to young people in my spare time. They learn about algorithms, data structures, object-oriented programming, and software design patterns. I also continue to learn about new technologies.

ABOUT MYSELF

As a skilled backend developer, I take pride in creating websites that provide an exceptional user experience. While my focus is on the technical aspects of website development, I also understand the importance of good design. By combining my technical expertise with a strong eye for design, I am able to deliver websites that not only function flawlessly but also delight users.
